WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER

Scorpion / Remote | 2021 - Current

Senior Engineer on Scorpion's new user-facing reporting platform. Collaborated with the VP of Engineering, 1 product manager, 2 designers, and 6 engineers to develop 100+ shared components for an enterprise-level application.

- Upgraded 40+ existing components to be reusable while adding additional features.
- Rewrote CSS Flexbox framework in SCSS, modernizing the code and reducing the output by over 33%.
- Assisted in creating documentation and interactive stories for all components and their respective states.

SENIOR FRONT-END PRODUCT DEVELOPER

Scorpion / Remote | 2017 - 2021

Senior front-end developer for Scorpion's internal website automation product (USC), which enabled project managers to generate client websites without a developer.

- USC contributed 7.5M in monthly recurring revenue with 2.5K clients.
- Collaborated with product managers, designers, and a team of product developers to ensure best practices for UI/UX and web accessibility.
- Lead front-end developer for the Scorpion's Advertising internal platform (CSX).
- Mentored 5 team members, enabling them to achieve professional growth and personal goals.

SENIOR WEB DEVELOPER

Scorpion | 2016 – 2017

Lead front-end developer responsible for collaborating with designers and project managers to build stunning and effective marketing websites for highest paying clients.

- Delivered 30+ projects, contributing $172K in monthly recurring revenue.
- Set company standard for responsive design.
- Earned employee of the month award.
